

TC-01 — add_application (happy path)

The screenshot shows the 'job-application-tracker' web application interface. The 'Tools' panel on the left lists 'Add Job Application' with the function 'add_application'. The 'Results' panel in the center displays a success message: 'Application added successfully.' followed by a JSON object:

```
{  "id": "app-003",  "company": "Google",  "role": "Frontend Developer",  "date_applied": "2026-07-30",  "status": "applied",  "source": "linkedin",  "notes": "Applied through LinkedIn."}
```

. The 'Messages' panel on the right shows a log entry at 17:42:00 for 'add_ap' with a 32ms duration. The browser's address bar shows the URL: `localhost:6274/?MCP_INSPECTOR_API_TOKEN=c1102d1290ee1b5787225f6d01496abb9d72d801a1b4ce957ca114f8229a393a`. The Windows taskbar at the bottom shows the time as 8:43 PM on 8/16/2026.

TC-02 — add_application (invalid date)

The screenshot shows the 'job-application-tracker' web application interface with an error. The 'Results' panel displays a 'Tool Error' message: 'Input validation error: Invalid arguments for tool add_application: date_applied: Invalid string: must match pattern /^\\d{4}-\\d{2}-\\d{2}\$/'. The 'Messages' panel on the right shows a log entry at 17:43:56 for 'add_ap' with a 30ms duration. The browser's address bar shows the same URL as in the previous screenshot. The Windows taskbar at the bottom shows the time as 8:44 PM on 8/16/2026.

TC-03 — list_applications (before fix — missing total/truncated)

The screenshot shows the 'job-application-tracker' web application. The 'Tools' panel on the left lists 'List Job Applications' with the tool name 'list_applications'. The 'Results' panel in the center displays a JSON array of two job applications. The first application is from 'Exalt Technologies' and the second is from 'Google'. The 'Messages' panel on the right shows a log of tool calls, including 'list_app' and 'add_app'. The application is running on localhost:6274 with an MCP Inspector API token.

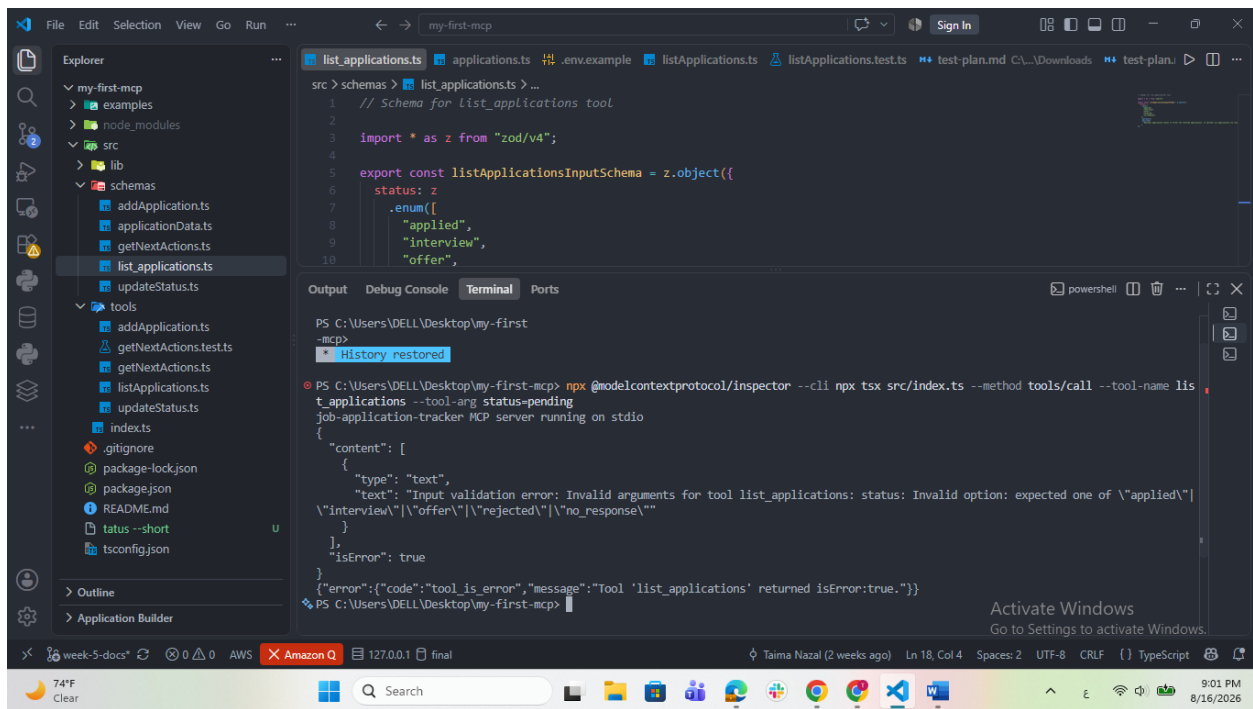

```
{
  "statusFilter": "applied",
  "applications": [
    {
      "id": "app-001",
      "company": "Exalt Technologies",
      "role": "Software Engineer Intern",
      "date_applied": "2026-07-01",
      "status": "applied",
      "source": "cold_apply",
      "notes": "Waiting for response"
    },
    {
      "id": "app-003",
      "company": "Google",
      "role": "Frontend Developer",
      "date_applied": "2026-07-30",
      "status": "applied",
      "source": "linkedin",
      "notes": "Applied through LinkedIn."
    }
  ]
}
```

TC-03 — list_applications (after fix — PASS)

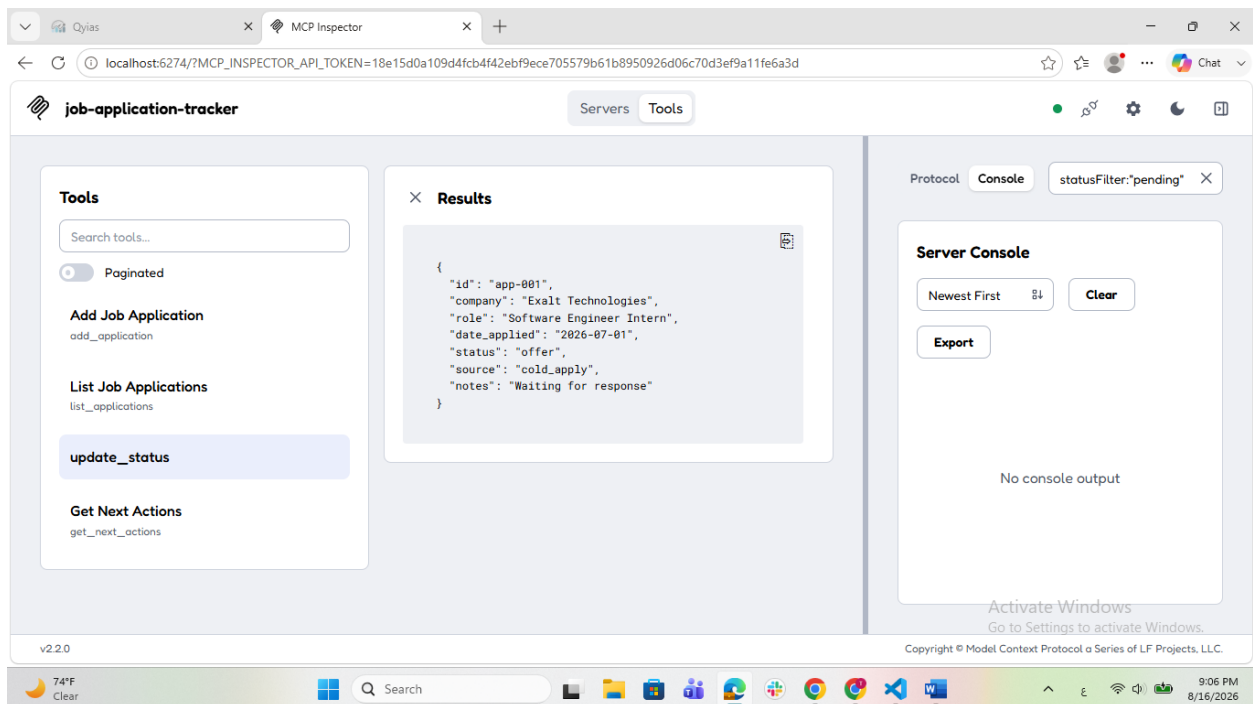

The screenshot shows the 'job-application-tracker' web application after a fix. The 'Results' panel now includes a 'total' field set to 2 and a 'truncated' field set to false. The 'Messages' panel on the right shows a log of tool calls, including 'list_app' and 'add_app'. The application is running on localhost:6274 with an MCP Inspector API token.

```
{
  "id": "app-001",
  "company": "Exalt Technologies",
  "role": "Software Engineer Intern",
  "date_applied": "2026-07-01",
  "status": "applied",
  "source": "cold_apply",
  "notes": "Waiting for response"
},
{
  "id": "app-003",
  "company": "Google",
  "role": "Frontend Developer",
  "date_applied": "2026-07-30",
  "status": "applied",
  "source": "linkedin",
  "notes": "Applied through LinkedIn."
}
],
"total": 2,
"truncated": false
}
```

TC-04 — list_applications (invalid status, via Inspector CLI)

TC-05 — update_status (happy path)

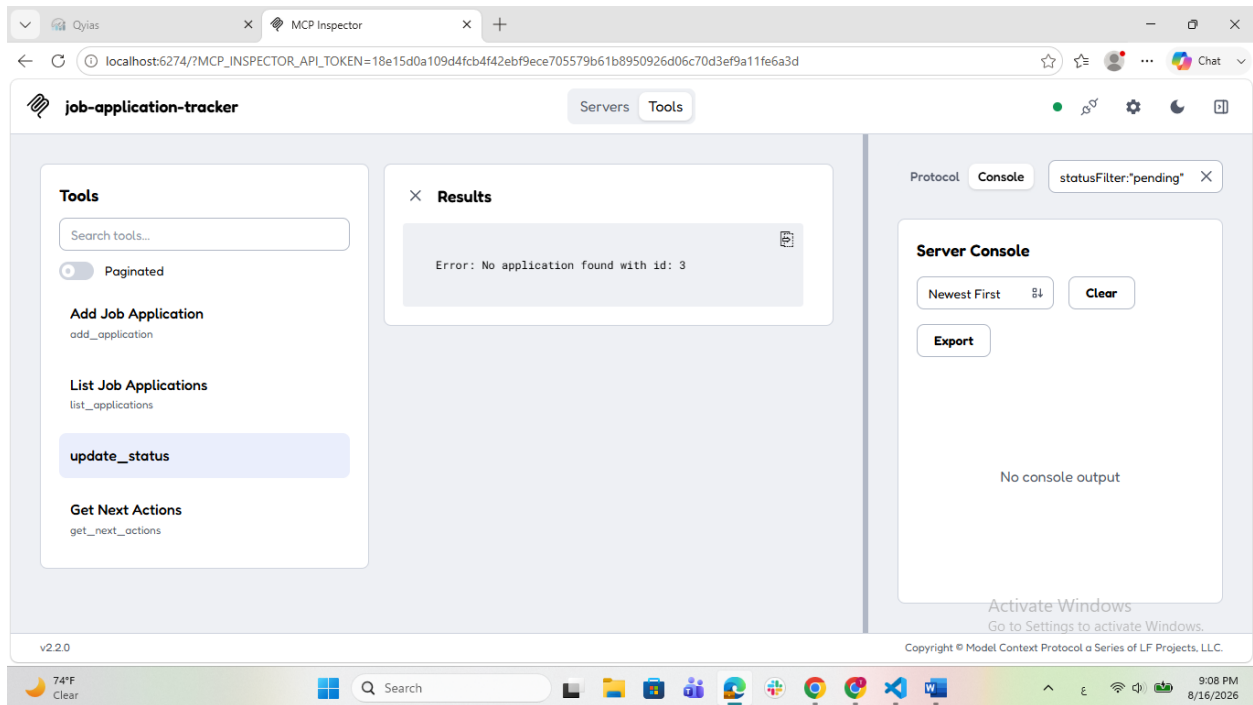

TC-06 — update_status (id not found)

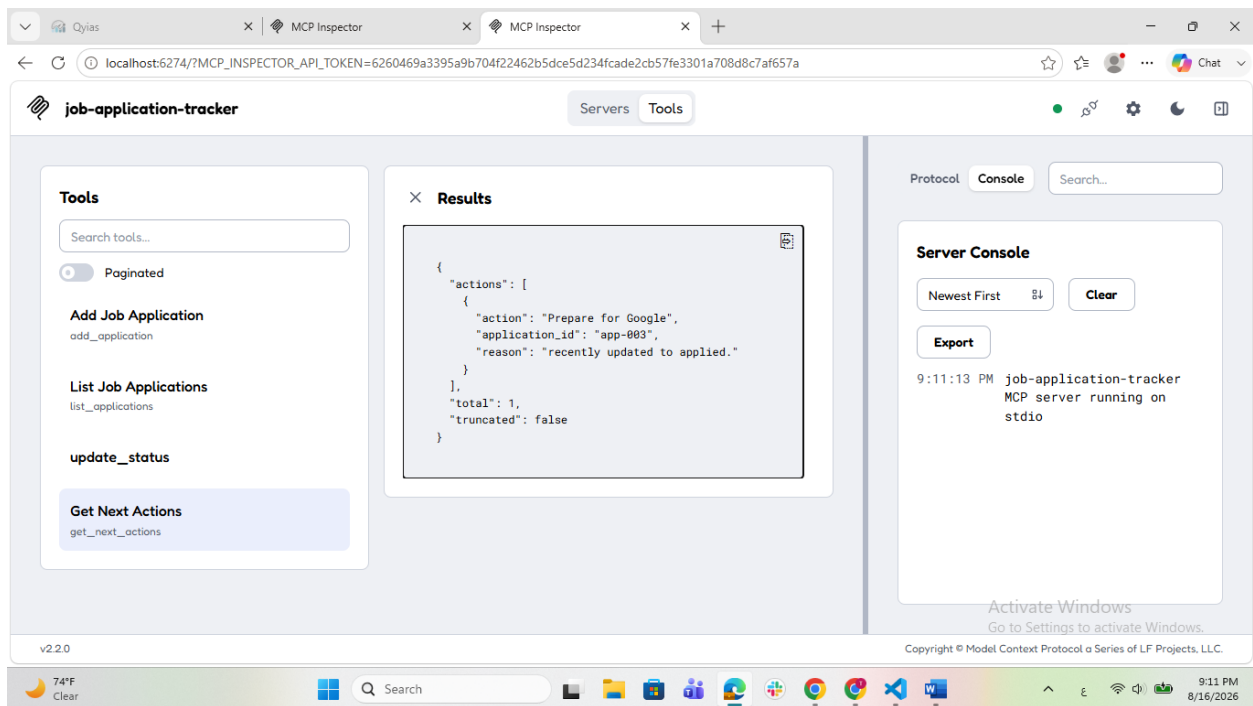

The screenshot shows the 'job-application-tracker' web application running in a browser. The URL bar displays 'localhost:6274/?MCP_INSPECTOR_API_TOKEN=18e15d0a109d4fcb4f42ebf9ece705579b61b8950926d06c70d3ef9a11fe6a3d'. The application has a 'Tools' sidebar on the left with options: 'Add Job Application' (add_application), 'List Job Applications' (list_applications), 'update_status' (highlighted), and 'Get Next Actions' (get_next_actions). The 'Results' panel in the center shows an error message: 'Error: No application found with id: app-999'. The 'Server Console' on the right shows 'No console output'. The bottom of the page includes a Windows taskbar with the date '8/16/2026' and time '9:06 PM'.

TC-07 — update_status (empty id)

The screenshot shows the 'job-application-tracker' web application with the 'update_status' tool selected. The 'Results' panel displays a 'Tool Error' message: 'Input validation error: Invalid arguments for tool update_status: id. Too small: expected string to have >=1 characters'. The 'Tools' sidebar and 'Server Console' are the same as in the previous screenshot. The Windows taskbar at the bottom shows the date '8/16/2026' and time '9:07 PM'.

TC-08 — get_next_actions (after fix — PASS)

TC-09 — get_next_actions (limit:0)

The screenshot shows the 'job-application-tracker' web application interface. The 'Tools' panel on the left lists several tools, with 'Get Next Actions' (get_next_actions) highlighted. The 'Results' panel in the center displays a 'Tool Error' message: 'Input validation error: Invalid arguments for tool get_next_actions: limit: Too small: expected number to be >0'. The 'Server Console' on the right shows the server is running on stdio. The browser's address bar shows the URL: localhost:6274/?MCP_INSPECTOR_API_TOKEN=067b4484b267a0bcf9b8d5b8e9f3d1c288437a0df0ce255a5be6920858824626. The Windows taskbar at the bottom shows the date and time as 9:15 PM on 8/16/2026.

TC-10 — get_next_actions (limit:50, safely clamped)

The screenshot shows the 'job-application-tracker' web application interface. The 'Tools' panel on the left lists several tools, with 'Get Next Actions' (get_next_actions) highlighted. The 'Results' panel in the center displays a JSON response:

```
{  "actions": [    {      "action": "Prepare for Google",      "application_id": "app-003",      "reason": "recently updated to applied."    }  ],  "total": 1,  "truncated": false}
```

. The 'Server Console' on the right shows the server is running on stdio. The browser's address bar shows the URL: localhost:6274/?MCP_INSPECTOR_API_TOKEN=067b4484b267a0bcf9b8d5b8e9f3d1c288437a0df0ce255a5be6920858824626. The Windows taskbar at the bottom shows the date and time as 9:16 PM on 8/16/2026.

TC-11 — list_applications (empty data)

The screenshot shows the 'job-application-tracker' web application in a browser. The URL is `localhost:6274/?MCP_INSPECTOR_API_TOKEN=c8a2c4062343862184e05ea4a538b10637f94c9e07b7587693fac1847c327a4f`. The 'Tools' tab is active, and the 'List Job Applications' tool is selected. The 'Results' panel displays a JSON object:

```
{  "statusFilter": null,  "applications": [],  "total": 0,  "truncated": false}
```

. The 'Server Console' on the right shows a message: '9:17:59 PM job-application-tracker MCP server running on stdio'. The bottom status bar indicates 'v2.2.0' and 'Copyright © Model Context Protocol a Series of LF Projects, LLC'.

TC-12 — list_applications (data unavailable)

The screenshot shows the 'job-application-tracker' web application in a browser. The URL is `localhost:6274/?MCP_INSPECTOR_API_TOKEN=4e0bbda9eef8f88434599f1712c6c8a8c3b0f569be96452f49b64bda0ae91fdf`. The 'Tools' tab is active, and the 'List Job Applications' tool is selected. The 'Results' panel displays an error message: 'Could not read applications data.'. The 'Server Console' on the right shows a message: '9:23:39 PM list_applications failed: Error: Could not read applications data. at loadApplications (C:\Users\DELL\Desktop\mcp\src\lib\applications.ts:20:11) at async listApplications (C:\Users\DELL\Desktop\mcp\src\lib\applications.ts:20:11)'. The bottom status bar indicates 'v2.2.0' and 'Copyright © Model Context Protocol a Series of LF Projects, LLC'.
